Section 2: Qualitative Assessment (To be completed by the Cohort Supervisor)

Comment briefly on the student's performance in the following areas, and assess each attribute out of a total score of 10.

40/50

1. Attitude towards work, people and life in general 8/10

The intern demonstrated a positive and professional attitude towards assigned duties and colleges. He approaches tasks with willingness and maintained a respectful and cooperative demeanour in the workplace. His outlook towards learning and improvement was commendable.

2. Respect for Authority and Workmates 9/10

The Intern ~~displayed~~ consistently showed respect for supervisors, policies and fellow workmates. Instructions were followed diligently and communication with team members was courteous and professional. They were receptive to guidance and feedback.

3. Character and Personality 8/10

The intern displayed good character, integrity and maturity throughout. He conducted himself responsibly and maintained a calm and professional personality even under pressure

4. Vision, Focus and Purpose 7/10

The intern showed a clear willingness to learn and improve his skills. Whilst still developing clarity on long term career goals, they demonstrate focus on assigned objectives and commitment to completing tasks to the best of his ability

5. Passion and Work Ethic 8/10

The intern exhibited a strong work ethic and enthusiasm for assigned responsibilities. They were punctual, reliable and showed initiative in learning new skills beyond his immediate duties

This serves to confirm that I JACOB CHIRAWO, in my capacity as the Cohort Supervisor, assessed the referred student objectively and omni – partially and all the information provided above is truthful and accurate.

Subject: Community Service Report – AFC Commercial Bank (ICT Department)

I am writing to submit a report on the community service I carried out at AFC Commercial Bank within the Information and Communication Technology (ICT) Department from 25 December 2025 to 08 January 2026. This report outlines the work I was involved in, the skills and knowledge I gained, and how this experience contributed to my personal growth and professional development. It also highlights how my contribution supported the ICT operations of AFC Commercial Bank and the broader banking community it serves.

AFC Commercial Bank is a well-established financial institution that provides a wide range of banking and financial services to individuals, businesses, and corporate clients. The ICT Department plays a central role in ensuring the smooth operation of core banking systems, digital banking platforms, payment systems, and internal enterprise applications that support daily banking activities.

During my community service placement, I was attached to the ICT Operations team, where I was exposed to real-world banking systems and enterprise ICT environments. My role involved supporting daily ICT operations, assisting with system monitoring, handling basic

user support tasks, and observing how critical banking systems are managed to ensure reliability and continuity of service.

My primary responsibilities included assisting with routine operational tasks across various banking systems. These tasks included monitoring system availability, supporting user access management, and assisting with standard ICT procedures such as account resets, system verification, deployments, automation, incidents and checklist-based operational checks. Through this, I gained a clearer understanding of how ICT underpins banking operations and ensures uninterrupted service delivery.

In addition, I assisted with documenting operational activities and observed how incident and service request management is handled within the bank. This involved working with internal support platforms where staff members log queries, incidents or technical issues. This exposure helped me appreciate the importance of structured support processes, accountability, and timely response in a regulated financial environment.

I was also introduced to several enterprise banking systems and infrastructure components, including core banking platforms, transaction processing systems, and digital banking support tools. My role was mainly supportive, observing and maintaining these systems in operations gave me valuable insight into the complexity, security requirements, and precision needed when managing financial systems.

My contribution supported the ICT team by handling basic operational and administrative tasks, which allowed senior staff to focus on more critical technical and strategic responsibilities. By assisting with system checks, restarts, troubleshooting, user support, and documentation, I helped ensure smooth daily operations and timely resolution of internal requests.

One key benefit of my community service to AFC Commercial Bank was the additional operational support provided during busy periods. My involvement helped reduce response times for minor ICT issues and reinforced the importance of teamwork and collaboration within the ICT department.

This community service experience was highly valuable as it allowed me to see how information technology is applied in a real banking environment. It strengthened my understanding of how ICT systems support financial transactions, customer service delivery, and regulatory compliance. The experience also helped bridge the gap between theoretical knowledge gained during my studies and practical application in the workplace.

Furthermore, the placement helped me develop professionalism, discipline, and a strong sense of responsibility. Working in a time-sensitive and security-focused environment improved my communication skills, attention to detail, and ability to work under pressure. I also learned the importance of confidentiality and accuracy when dealing with financial systems.

Observing how ICT professionals work together to resolve system issues and support banking operations was particularly inspiring. This experience has strengthened my interest in pursuing a career in ICT within the financial services sector and motivated me to continue developing my technical and analytical skills.

Conclusion

In conclusion, my community service at AFC Commercial Bank was a rewarding and educational experience. It allowed me to contribute to the ICT department while gaining practical exposure to enterprise banking systems and operational processes. Through operational support, documentation, and system monitoring, I developed essential skills and professional competencies that will be valuable in my future career within the ICT and financial services industry.
